DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of embodiment 1 (Groups I and II) in the reply filed on 1-27-05 is acknowledged. The traversal is on the ground(s) that there is no undue burden on the Examiner. This is not found persuasive because applicant provides separate and distinct embodiments throughout the specification.

The requirement is still deemed proper and is therefore made FINAL. Applicant is advised claims 1, 2, 5, 6, 8, 13-16, and 18-21 will be examined. The remaining claims do not claim a hole in the heel. The "hole filled with material" is not considered a heel with a hole (see claim 7).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-16, 18, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. No antecedent basis for "wrapping layer". Also, the wrapping layer in combination with the hole is not clear.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 20, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Ahn et al (6,015,354). Ahn discloses a golf club head comprising a hosel and a heel. The hosel is capable of engaging with a shaft. The heel includes a hole comprising weights for changing mass distribution (col. 6, lines 39-55). Regarding claims 20 and 21, the limitations appear to be method steps of manufacturing that do not have an effect on the final product (MPEP 2113).

Allowable Subject Matter

Claims 2, 5, 6, and 13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
